

GLOBAL LEADERS

IN FACIAL RECOGNITION FOR THE BANKING SECTOR

Global leaders in facial recognition for the banking sector

"Since we implemented Selphi in our eBanking App, the use increased more than 40% just in the first 3 months, thanks to the great UX."

Javier Ramírez - Digital Manager at Banco Industrial (Guatemala)

"In its continuous innovation, Banco Guayaquil has found in FacePhi a valuable partner to its digital strategy."

Franz Zambrano - Architecture and Innovation Technology Manager at Banco Guayaquil (Ecuador)

"Since we implemented Selphi, we've registered an important reduction of 93% of fraud in our mobile banking app."

Juan Carlos Beltrán - Operational Risk Manager at Banco Pichincha (Ecuador)

"HSBC Smart Time makes it easy for you, as easy as looking into the camera."

"Among all the biometrics we evaluated, FacePhi is the most secure and accurate technology, as well as the support they offer."

Gonzalo Diego Díaz Sola - Online Banking Manager at ICBC (Argentina)

Facial Authentication Solution

The only facial biometric solution adapted to mobile banking where the users can access to their banking accounts just taking a selfie.

Take a selfie

Login with just a selfie avoiding the use of a username or a password.

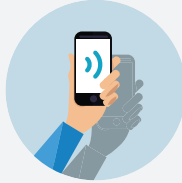

Access your accounts

That's it! An easy way to get access to your mobile banking accounts.

PhiVox))

Voice Authentication Solution

Phivox validates the person identity from its unique voice characteristics. Response time in less than 0.4 seconds.

Talk to identify

Say or repeat what you are being asked to get access to your private area.

Access your accounts

Use voice as a second factor to add security to your banking account.

me

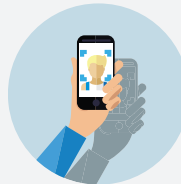

Digital Onboarding Solution

Me combines the ID verification to open bank accounts without the necessity to go to the bank, and also the user authentication to get access to them.

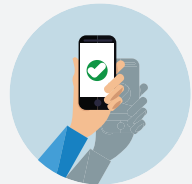

Scan your ID card on both sides

The technology extracts all the document data and automatically verifies the ID.

Take a selfie

Liveness test and comparison of the selfie with the ID document picture.

Account created!

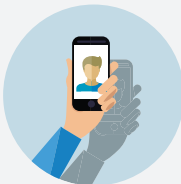

Identity verification completed in seconds.

identiphi

COMPARING LIVE IMAGES

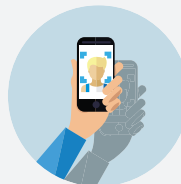

Comparing Images Solution

The technology of Identiphi consists in the authentication of two images giving back the following data: Similarity percentage, race, age and gender.

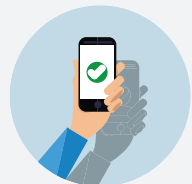

Choose a valid picture of you

Identiphi allows the client to know if two faces are from the same person.

Take a selfie

Liveness test and comparison of the selfie with the picture chose.

Comparison in 1"

The technology compares if it is the same person or not in less than one second.
